

Lamb cat food

Tip: this recipe is substantial, so I divide all my ingredients in half and mix each in two large bowls (so, two sets of dry, wet and meat each). This is a lot of food to fit in a single big mixing bowl.

Dry ingredients

1	6½ tsp eggshell calcium 1800 IU dry vitamin E 8000 mg taurine 4 capsules glandular 5 capsules vitamin B 100 2 tsp lite salt	Combine dry ingredients in a small mixing bowl, set aside.
---	--	--

Wet ingredients

2	9 lg raw egg yolks 2 c water 2 tsp salmon oil	Combine wet ingredients in a small mixing bowl, then cover and place in containers in the fridge.
---	---	---

Meat ingredients

3	7 lbs lamb meat 2 lbs lamb heart 1 lb lamb liver ½ lb lamb kidney	Grind all meat ingredients placing a large mixing bowl beneath the grinder spout (tip: mix before going through the grinder to help distribution before mixing all the rest).
---	--	---

Last ingredient

4	2 packets unflavored gelatin	Set aside
---	------------------------------	-----------

After preparing the above in three separate bowls (dry, wet and meat), place the mixing blade on a kitchen mixer and fill the mixing bowl with layers of each: meat, wet and dry ingredients and repeat til all ingredients are in (layering helps even mixing). Once mixed and with mixer still going, sprinkle-in gelatin. Portion into small containers and freeze, keeping 1-2 cups per kitty in the fridge (ready to eat) at all times.

How this recipe was calculated

Using USDA data and a product label (plus the company's support), I calculated a 1.2:1 ratio of CA to P.

	Ingredient	Unit of Measure	Grams	Calcium	Phosphorous
1.	Lamb stew	112 oz.	3175	286	6001
2.	Lamb heart	32 oz.	907	54	1588
3.	Lamb liver	16 oz.	454	32	1651
4.	Lamb kidney	8 oz.	227	29	558
5.	Egg yolks	9 large	153	197	597
6.	Eggshell calcium	6.5 tsp	92	12350	[trace amt]
Total				12948	10395
				[1.2]	[1]
